

## Privacy and Protection for Your Residential or Commercial Property

Are you looking for a fence company in Houston, Texas? What type of product do you want a fence company to provide for your Houston property? A good fence company in Houston offers a wide range of products and services for both residential and commercial properties.

If you are looking for privacy and protection of your residential property, your fence company in Houston can offer you a wide selection of fences constructed from wood, chain link, iron, aluminum and vinyl. And, if you desire a higher level of protection than that provided by a standard yard fence, your fence company in Houston will install access control devices like automated vehicle gates and closed circuit devices. If you want a fence company in Houston to secure your commercial property, you can choose from the same fence materials as those offered for residential properties and additional security features like gate operators, pass card readers, digital key pads, communications systems and "911" lock boxes. (If you wish, you can have the same security features installed on your residential property as well.)

Many homeowners hire a fence company in Houston to install a classic wooden fence around the perimeter of their property both for privacy and security and for that "white picket fence" feel. These fences are constructed mainly from treated pine, cedar or fir. Chain link and vinyl coated chain link is also used by fence companies in Houston for many residential fences, as well as those securing most commercial properties. Fences made of ornamental iron add elegance to both residential and commercial properties and can be customized to any building decor.

Or, how about hiring a fence company in Houston to install a brick privacy wall? Constructed from beams and piers that are manufactured from maintenance free materials, this wall supports itself without need of a concrete foundation. Each panel moves with the surrounding soil, preventing cracks from forming in the wall material.

Commercial properties can benefit aesthetically from having a fence company in Houston install a wooden fence instead of one made from chain link. Wooden fences also provide more privacy. Consider the appeal factor of wooden fencing as it surrounds residential communities, farms and parks. Contact your fence company in Houston for information on how wooden fences can enhance the appearance and the appeal of your commercial property.
