

Use Love Calculator to see if you are compatible with your lover

For ages now, lovers and potential lovers have sought solace in any instrument that assures them of the love they cherish or hope to cherish. However unfruitful the search be, ones heart seeks solace however artificial it be.

The Love Calculator is indeed a popular and well known application online. For years and years it has been on the web and any internet user is sure to have encountered it. Like other annoying applications like the Hamster Dance and dancing baby, the love calculator has achieved legendary status on the net as well and has been rendered immortal in the world of forwards. One would say, almost virus like in its character, the trend has flooded mailboxes.

Of course, the application justifies and validates its authenticity with an explanation. Here is what the makers of the application say.

A name can tell a lot about the person named. They mean something and it is not without reason that a name is chosen. Doctor love has envisioned this while designing this Love Calculator just for the lonely you.

More often than not, one aches to know whether a relationship with someone is worth it. Therefore Doctor Love himself designed this great machine for you. The quotient of success with respect to the relationship between two people can be calculated. The Love Calculator is an affective way to get an impression of what the chances are on a relationship between certain people.

Boredom of course lends one to pass time on the net and in the course, download a few applications like the Love Calculator. It has a simple edifice with two text boxes to enter the names and an enter button. One simply types the desired names in the boxes and presses enter. The result is a percentage that is a purported derivation from the names entered. This supposedly is a reflection of romantic plausibility between the two names. Not at all a bad attempt, one would dismiss in brevity. Closed and narrow though the approach and definition of love is here, there is many a love struck person who has used this. "Dr. Love" holds a rather traditional conception of the idea of love.

Now not all of us are experts like Dr. Love. A more complex approach taking in more details and then computing based on a similar formula would provide for more brevity. An enhancement indeed. There are many that have of late sprouted over the World Wide Web.

Are you checking whether a friend loves you or are you checking for a love that needs to be reaffirmed? Extra details like their date birth, etc might be of handy in refining the figure to a more sophisticated portrayal of their love for you. These of course result in the accurate portrayal of your love, as the website claims. No harm trying, we suppose. Similar articles [Love poems](#) -
