

10 Ways That Portable Storage Can Help Your Move

1. Get packed at your pace. Youve probably had plenty of rushed moving days in your life, running around like crazy to get things ready for the movers. Pretty stressful, right? [Portable storage](#) lets you get things ready when youre ready. Would you rather take all the time you need to pack-- even weeks? With a portable storage unit, you can.
2. Super simple loading. If you dont pay somebody else to do it, getting heavy boxes and furniture into a moving truck isnt fun-- and can even be dangerous. Dont risk injuring your back! Portable storage units sit flat on the ground, making loading and unloading easy and safe.
3. Keep your things safe. Even when you use a reputable company, you cant always be sure that something might not get "lost during the move." Its hard to be trusting with people you dont know. With portable storage, you can keep an eye on your possessions. A portable storage container is locked and inaccessible to anybody but you.
4. Spend less. While hiring movers seems like a nice option, all that manpower is expensive-- even doing it yourself with a moving truck is costly. Because portable storage is a hands-off moving method, its also cheaper than the alternatives.
5. Get your things out from under-foot. Moving is a chaotic time. And seeing your possessions boxed up and cluttering your house makes it worse. With portable storage, its easy to pack intelligently. You can pack up what you dont need first, and place it in your portable storage unit to get it entirely out of the way.
6. Stay out of the drivers seat. Maneuvering a large moving truck to your new home is a difficult (and stressful) job, unless you have plenty of experience. If you use a portable storage container, however, you simply make a call and the container is relocated for you.
7. Leisurely unpacking. When you use movers or a moving truck, all boxes and furniture --even the stuff youre not ready to use-- goes into the house at the same time. With portable storage, you unpack at your own pace, leaving some items in the portable storage unit until youre ready for them.
8. Easy temporary storage. Moving sometimes requires a little extra planning-- and a bit of a transition. If youre going to be staying in a temporary home during the transition, your portable storage unit can be stored in a warehouse until youre ready for your things.
9. Make time for moving the family. Especially for families with children, moving day is a difficult time. With a portable storage unit, you dont have to worry about your things on moving day. You simply make a call, and theyre transferred to your new home for you. You get to focus on moving your children safely to your new home.
10. Reduce stress. Studies have shown that moving is an incredibly stressful experience for most people. After all, its difficult going without a permanent home! Portable storage cuts down on moving stress, as not having to keep track of your packed items, a truck, and movers makes the whole day go more smoothly.
